MasterChef of Investing

First Quarter 2015

In the popular TV program *MasterChef*, contestants face a series of cooking challenges. From low quality ingredients to inadequate preparation and poor implementation, so many things can, and do, go wrong. It's a bit like investing.

In the world of investment, there customarily are two broad approaches. The first is a traditionally active one: Managers attempt to find mispriced securities or seek to time their entry and exit points from various parts of the market.

This first approach is akin to the *MasterChef* challenge, which requires inventing a new and distinctive dish within a set time frame. The apparent advantage for the chef is flexibility of concept.

Likewise, in the investment world, the traditionally active manager locks in on individual ideas. That results in little flexibility and creates time constraints. The manager tries to trade on information not believed to be reflected in prices. If it doesn't work out, there may not be a Plan B.

The second approach to investing is when the investment manager seeks to track as closely as possible to a commercial index. The goal here is not to stand out, so the manager will be most conscious of "tracking error" (deviating from the benchmark).

This approach is more akin to the *MasterChef* challenge in which contestants must cook a standard, popular dish with set ingredients. The focus is not creativity but following an established process as dictated by an outside party.

But the drawback of this latter approach is the absence of flexibility. The contestants can't substitute one ingredient—or stock—for another. The recipe must be followed. What's more, it must be achieved in a designated timeframe.

But what if we had a system that combined the creativity of the first approach with the simplicity of the second?

In this third approach, our contestants do not face unnecessary constraints either in terms of time or ingredients. Instead, they assemble a broad selection of dishes from multiple ingredients appropriate for the season and at times of their choosing.

The difference under this third way is that the chefs can focus on what they can control and eliminate elements that might restrict their choices. After all, their ultimate goal is to efficiently and consistently provide meals that suit a range of palates.

In the world of investing, we believe this third way is the optimal approach. Picking stocks and

timing the market, like making brilliant-off-the-cuff meals in any conditions and in an efficient and consistent manner, is a tough task—even for the masters. Cooking meals off a provided menu, like the index managers, can be inflexible and costly.

The third way of investing is akin to the Dimensional approach.

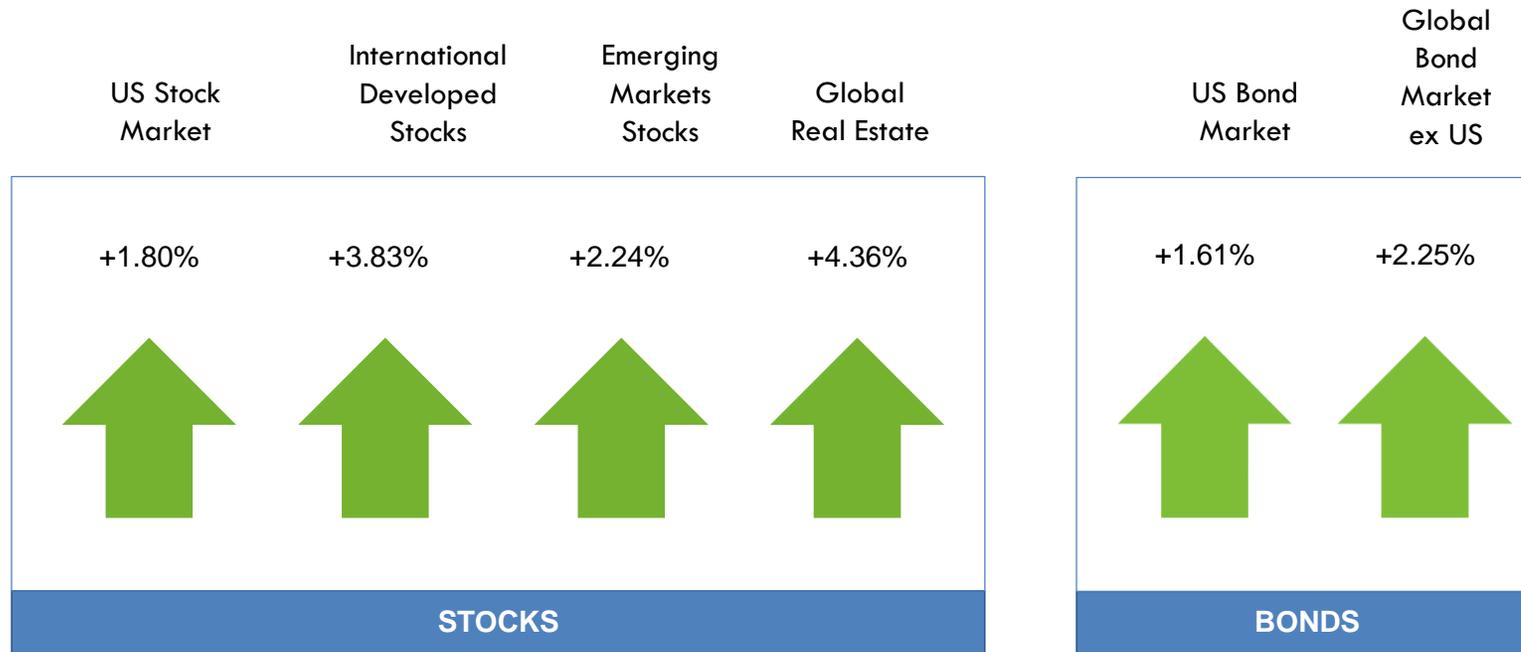

We can research the dimensions of expected returns, design highly diverse portfolios that pursue market premiums, and build flexibility into the system so that we efficiently and consistently serve up investment solutions for a wide range of needs.

Call it the MasterChef of investing.

International Developed Stocks

First Quarter 2015 Index Returns

Developed markets outside the US outperformed both the US and emerging markets indices in US dollar terms.

Small caps slightly outperformed large caps.

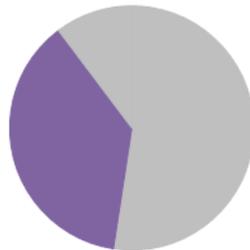

Value indices underperformed growth indices, particularly in large caps.

The Swiss franc was the only major developed markets currency to outperform the US dollar. The Swiss central bank removed the three-year currency cap to the euro.

Fixed Income

First Quarter 2015 Index Returns

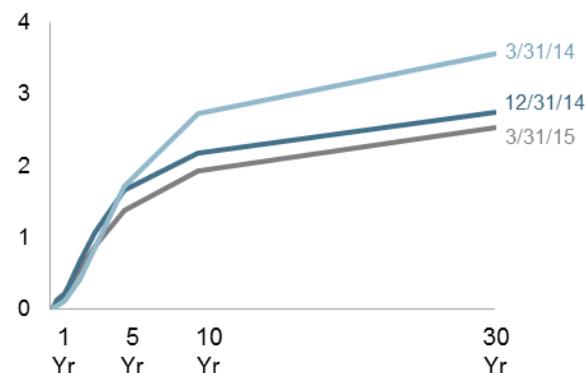

Interest rates across the US fixed income markets generally declined in the first quarter. The 5-year Treasury note dropped 28 basis points to end the period yielding 1.38%. The 10-year Treasury note declined 24 basis points to finish at 1.93%. The 30-year Treasury bond fell 21 basis points to finish with a yield of 2.54%.

On the short end of the curve, the 2-year Treasury note shed 12 basis points to finish at 0.66%. Securities within one year to maturity were relatively unchanged.

Long-term corporate bonds returned 3.29% for the quarter. Intermediate-term corporate bonds followed by adding 1.89%.

Municipal revenue bonds (1.13%) slightly outpaced municipal general obligation bonds (0.87%). Long-term muni bonds outgained all other areas of the muni curve, returning 1.58%.

Quotes

First Quarter 2015

“The great strategy you can’t stick with is obviously vastly inferior to the very good strategy you can stick with.”

-Cliff Asness, AQR Capital Management

“There are no bargains in the absence of fear.”

-Rob Arnott

“If you aren’t willing to own a stock for ten years, don’t even think about owning it for ten minutes. Put together a portfolio of companies whose aggregate earnings march upward over the years, and so also will the portfolio’s market value.”

-Warren Buffett

“If anyone needed a reminder how hard it is to divine the future, look at the recent history of energy prices.”

-John Kimelman, *Barron's*, December 18, 2014

“The ability to distinguish between volatility and loss is the first casualty of a bear market.”

-Nick Murray, *Simple Wealth, Inevitable Wealth*

“The Stock Market is designed to transfer money from the Active to the Patient.”

-Warren Buffett
