Quarterly Market Review

First Quarter 2017

Quarterly Market Review

First Quarter 2017

This report features world capital market performance and a timeline of events for the past quarter. It begins with a global overview, then features the returns of stock and bond asset classes in the US and international markets.

The report also illustrates the impact of globally diversified portfolios and features a quarterly topic.

Quarterly Topic: Investment Shock Absorbers

Investment Shock Absorbers

First Quarter 2017

Ever ridden in a car with worn-out shock absorbers? Every bump is jarring, every corner stomach-churning, and every red light an excuse to assume the brace position. Owning an undiversified portfolio can trigger similar reactions.

You can drive a car with a broken suspension system, but it will be an extremely uncomfortable ride and the vehicle will be much harder to control, particularly in difficult conditions. Throw in the risk of a breakdown or running off the road altogether, and there's a real chance you may not reach your destination.

In the world of investment, a similarly bumpy and unpredictable ride can await those with concentrated and undiversified portfolios or those who constantly finker with their allocation.

Of course, everyone feels in control when the surface is straight and smooth, but it's harder to stay on the road during sudden turns and ups and downs in the market. For that reason, the smart thing to do is to diversify, spreading your portfolio across different

securities, sectors, and countries. That also means identifying the right mix of investments (e.g., stocks, bonds, real estate) that aligns with your risk tolerance.

Using this approach, your returns from year to year may not match the top performing portfolio, but neither are they likely to match the worst. More importantly, this is a ride you are likelier to stick with.

Here's an example. Among developed markets, Denmark was number one in US dollar terms in 2015 with a return of more than 23%. But a big bet on that country the following year would have backfired, as Denmark slid to bottom of the table with a loss of nearly 16%.¹

It's true that the US stock market (by far the world's biggest) has been a strong performer in recent years. But a decade before, in 2004 and 2006, it was the second worst-performing developed market in the world.¹

Predicting which part of a market will do best over a given period is tough. US small cap stocks were among the top performers in 2016 with a return of more than 21%. A year before, their results looked relatively disappointing with a loss of more than 4%.

International small cap stocks had their turn in the sun in 2015, topping the performance tables with a return of just below 6%. But the year before that, they were the second worst with a loss of 5%.²

If you've ever taken a long road trip, you'll know that conditions along the way can change quickly and unpredictably, which is why you need a vehicle that's ready for the worst roads as well as the best. While diversification can never completely eliminate the impact of bumps along your particular investment road, it does help reduce the potential outsized impact that any individual investment can have on your journey.

With sufficient diversification, the jarring effects of performance extremes level out. That, in turn, helps you stay in your chosen lane and on the road to your investment destination.

Happy motoring and happy investing.

Quotes

First Quarter 2017

“I would not want it to be thought that any system is the Kingdom of God on Earth. Capitalism isn’t. Democracy isn’t. The two combined are not. The best that can be said for them (and it is quite enough) is that, in combination, capitalism, democracy and pluralism are more protective of the rights, opportunities, and conscience of ordinary citizens (all citizens) than any known alternative.”

-Michael Novak, 1933 - 2017

“While there is disagreement about what the most effective policies would be, some combination of improved public infrastructure, better education, more encouragement for private investment, and more effective regulation all likely have a role to play in promoting faster growth of productivity and living standards.”

-Stanley Fischer, Vice Chairman of the Federal Reserve Board of Governors. “Longer-Term Challenges for the U.S. Economy” presentation, 11/21/16

“Every decade or so, dark clouds will fill the economic skies, *and they will briefly rain gold.*”

-Buffett, Berkshire 2016 annual letter (emphasis added)

“In 2011, I published a book called the *The Big Secret for the Small Investor*. I always say it is still a big secret because no one bought it. It talked about a couple of studies, including the best performing fund from 2000-2010 which was up 18% a year even when the market was flat. The average investor in that fund went in and out at the wrong times on a dollar weighted basis to lose 11% per year. Meanwhile, the statistics for the top quartile manager for that decade were stunning: 97% of them spent at least 3 of those 10 years in the bottom half of performance, 79% spent at least 3 years in the bottom quartile; and 47% spent at least 3 years in bottom decile.”

-Joel Greenblatt, Barron’s 10/17/16

“He has half the deed done who has made a beginning.”

- Horace

“He who knows that enough is enough will always have enough.”

- Lao Tzu
